Chief of Police

Mark W. Dukatz
Deputy Chief of Police

PRESS RELEASE - UPDATE **Rising River Levels - Flood Prone Property Preparedness** **October 8, 2018**

City Staff have been working with the National Weather Service (NWS) to evaluate the rainfall amounts and corresponding effect on river levels in the area. Areas to the south of Northfield in the Straight and Cannon River watershed areas have received consistent rainfall in the previous 48 hours, and water levels in the Cannon River are expected to rise as the rains continue. Rainfall is expected to continue over the next 48 hours.

NWS professionals have created the attached graph depicting potential rainfall and resulting possible Cannon River levels in Northfield. NWS is still predicting the Cannon River to peak at approximately 898' on Thursday, October 11, 2018. The river level is expected to slowly fall after that time. In Northfield, 897' is considered flood stage. If the river reaches that level, some Northfield properties and park areas along the river would be directly affected.

Property owners in flood prone areas are urged to evaluate their flood preparedness and monitor weather information and river levels.

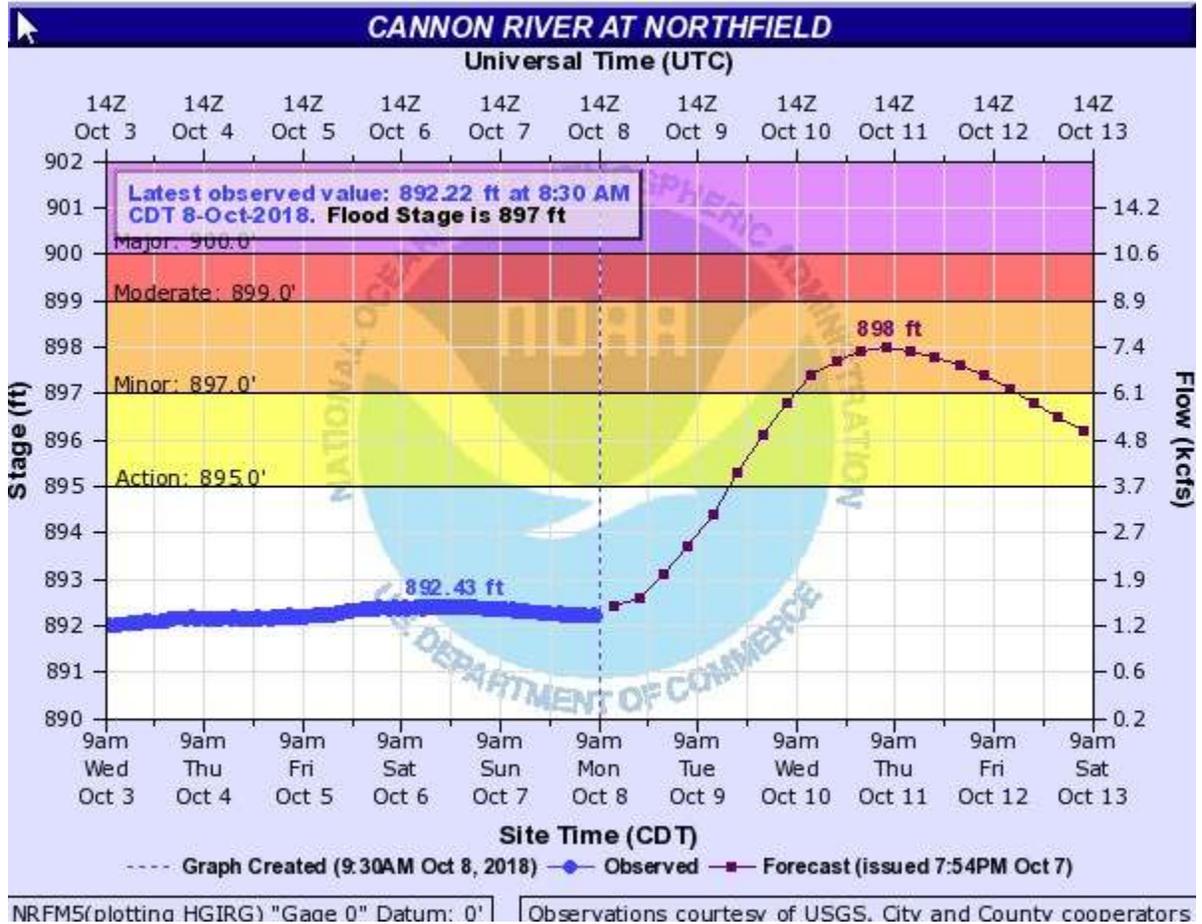

- Please check personal devices and subscriptions used to receive weather alerts to ensure you have the ability to monitor such alerts.
- If your home or business is in the river/flood zone, please make sure you have the materials, resources, and/or contacts necessary to enact protective measures if needed.
- We have posted numerous resources, guidelines, and contact information on the Northfield website home page, under "Emergency Preparedness Resources", at the following link <http://www.ci.northfield.mn.us/index.aspx?NID=985>

City personnel will continue to monitor weather and river levels and will disseminate more information as it becomes necessary. Check the City of Northfield website for updates. Please contact Mark Dukatz at 507-663-9302 with any questions.
