

# SNOW REMOVAL AROUND DUMPSTERS

Dick's Sanitation Inc. drivers need to have clear and safe access to your dumpster(s) at all times. Excessive snow piles and ice build up around the enclosure will prevent the driver from emptying the dumpster. For example, not shoveling the snow in front of and around dumpsters and corral doors during the winter months. This creates an unsafe area for our drivers. Piles of snow make it impossible to get

corral doors open and impossible to get close enough to empty the dumpster. If your dumpster is blocked by anything at any time, we will do our best to notify you as soon as possible so you have the opportunity to clear the area.

Below are two examples of enclosures. Please make sure you or your snow removal service clear out the enclosure so that we can provide safe service to your company.

## CORRECT

In this picture, you can see there is no snow in or in front of the enclosure. The gate can be opened and closed and the dumpster can be pulled out without any problem.

## INCORRECT

In this picture, you can see that the one gate is completely covered and the driver is unable to pull the dumpster out because of the snow.

Thank you for your cooperation.
