

# Performance standards and design guidelines for industrial uses defined:

- **Standards:**

- Noise
- Exterior Lighting
- Height
- Linkages
- Electric grid connectivity and use
- Renewable energy
- Site Design

- **Performance Standards:**

- Air quality and odors
- Heat and humidity
- Water use
- Energy use
- Hazardous material handling and recycling
- Use of solvents

# Performance standards

## Data processing:

- **What we heard:**

- Too much noise
- Too much vibration
- Too bright
- Too much energy use
- Too much water use

- **How addressed:**

- Measurable standards:
  - Noise
  - Vibration
  - Light
  - Water
  - Energy
- Dark skies
- Off-grid connectivity
- Glycol or passive cooling
